			Mark selected box for each sample to be tested →																			

Other analysis required:

Sampling remains the responsibility of the client. Please note samples need to be kept in a cooler box and transported in accordance with the National Road Traffic Act and Regulations (Triple Packaging), samples must be delivered within 24 hours. If the samples are not properly handled or sealed, it might influence the sample quality and possibly the test results. The onus lies with the client to ensure that samples are received within the set timeframe, the laboratory may reject any sample that is of poor quality. In which case a new sample will need to be submitted by the client. Methods marked with a "*" are not accredited. Results may be shared with a third party for example in the case of an audit, but this third party will also be bound by confidentiality. All Notifiable Disease results will be shared with the applicable State Veterinarian as required by National Regulations.
